

You can see some **Mocktail twist recommendations** below.

Nearly all our **alcoholic cocktails** can be created without alcohol or with **Low ABV**, this also includes the latest 0 % spirits & liqueurs range.

Please note that most mocktails that contain 0 % branded alcohol instead of just juices, syrups, purees, herbs & spices, may be a similar or higher price than alcoholic products.

Why? This is because the creation of these products, is often exactly the same process, but they require more crafting once distilled to then remove the alcohol or the ingredients/methods used for productions are much higher in costs.

These products are also exceptionally new to the industry and therefore a substantial amount is because of marketing new products.

Many of our drinks can also be adapted, into health juices or smoothies, upon request.

Ask your event manager.

For events we would recommend choosing no more than 4-6 mocktails to display on a menu, allowing speed of service.

Virgin Mary

Choices: *Mild or Spicy*
"A bartender's breakfast"

Tomato juice seasoned with worcestershire sauce, tabasco, lemon, pepper, and salt

0% Bucks Fizz
